

CONTENTS

ABSTRACT.....	2
1 INTRODUCTION	3
2 GENERAL INFORMATION AND MAPS OF THE STUDY AREA	4
2.1 Climate.....	4
2.2. Vegetation zones and soil types.....	7
2.3 Geology.....	11
2.3.1 Pre-Quaternary deposits.....	11
2.3.2 Quaternary deposits	15
3 METHODS	15
3.1 Source data.....	15
3.2 Methods of investigation	20
3.2.1 Integrated database	20
3.2.2 Analytical work.....	27
3.2.3 Data processing.....	27
3.2.4 Assessment of environment status and mineral potential of the study area	29
4 GEOCHEMICAL ATLAS OF NORTHERN EUROPE	32
4.1 Accessory maps	32
4.1.1 Map of landscape zoning	32
4.1.2 Zoning according to the natural geological and bio-climatic conditions.....	34
4.1.3 Map of human activity at the scale of 1:5,000,000.....	34
4.1.4 Map of Major Mineral Deposits	36
4.2 Maps of the spatial distribution of elements and their associations	38
4.2.1 Terrestrial moss.....	40
4.2.2 Organic soil horizon.....	40
4.2.3 Surface waters.....	41
4.2.4 C-horizon of soil (total element concentrations)	42
4.2.5 C-horizon of soil (partial extraction of elements).....	43
4.2.6 Stream sediments and the fine fraction (<0.06 mm) of till.....	43
4.2.7 Comparison of different sample media.....	44
4.3 Maps of integrated anomalous geochemical fields (AGFs).....	45
4.4 Ecogeochemical map of Northern Europe at the scale 1:5,000,000	45
4.5 Map of Ore-Related Geochemical Anomalies at the scale 1:5,000,000	48
5 CONCLUSIONS	59
